

What are the differences between installing using a template or using an ISO

Main differences between a template and an ISO

- On Leap GIO Cloud, you can either use one of the templates that we provide or use your own ISO files. The below are the main differences between these two options.

Leap GIO Public Templates	Customer ISO Templates
.OVA files	.ISO files
Default Root Volume is 50Gb and cannot be extended	Default Root volume can be customized
VMware tools are installed	VMware tools are NOT installed (but recommended)
No major configuration needed	Needs to be configured
Vulnerability already tested	Vulnerability is not tested
Root password can be reset through the web portal	Root password cannot be reset through the portal
